

PS NOISE HARVESTER

CONVERT PERFORMANCE-ROBBING AC LINE NOISE TO HARMLESS LIGHT

YOUR FIRST LINE OF DEFENSE

Bust noise right at the source. The Noise Harvester is the world's only device that eliminates line noise from the home's power lines. Filters and conditioners either shuffle the line noise away or provide some isolation for equipment, but they do NOT eliminate or remove power line noise. Only the Noise Harvester demolishes line noise and converts it to another form of energy. The other form? Light! Give your power conditioner a fighting chance by lowering the noise floor of the power line — the first line of defense.

FEATURES

- Converts line noise to light
- Works at frequencies 10x lower than other filters
- Dramatically lowers the noise source
- Works throughout the home
- Multiple Harvesters work in parallel
- Use with existing power conditioners
- Available in white or black
- Part of a complete PS Power Delivery System (PDS)

BENEFITS

- Line noise goes away instead of being directed to ground
- Helps a/v gear perform its best
- Improves performance nearby equipment
- Plug in near appliances to help reduce noise at your gear
- Further reduces noise and improves a/v fidelity
- Parallel filtering improves existing conditioners
- Easy to match to room decor
- Improvement when used with other PDS components
